THULE FLYOVER VIDEO RELEASED

Alba has released a video of a flyover of the Thule Black Sands North-West Target, taken during our September field programme. The video demonstrates the potential scale of the mineralisation within our project. The North-West Target represents 9km of the total 22km straight-line coastline within our licence area. The video has been annotated to show the key features including the location of high grade composite sample number 2 (54% THM and 13.1% in-situ ilmenite).
